

Smartovate — Flagship Product: Subul (SUBUL)

Subul is Smartovate's flagship AI-powered platform, combining EdTech and HRTech. It is designed to guide students and professionals through personalized career orientation, skill development, and employability enhancement.

What Subul offers:

- Personalized learning paths and mentorship opportunities
- Career exploration, upskilling, and access to internships/project opportunities
- Data-driven insights for institutions to support talent development
- AI-guided task management (prioritization support)
- Interactive smart tours that turn knowledge into immersive experiences
- Real-time collaboration and progress insights
- Hands-on labs, certifications, and career-readiness resources
- Voice AI features (via Deepgram and Cartesia integrations) aimed at use cases such as enabling insurance agents to sell and communicate more effectively from anywhere

Subul is also referenced under an expanded name, "Smart Unified Blended Universal Learning," and has been formally accepted as a project by the Équipe Projets Transverses at Paris Panthéon-Assas Université, reflecting an academic partnership focused on hybrid learning innovation.

A discounted access program (70% off, via promo code) has been run in partnership with SecuriNets FST to help students and tech enthusiasts access Subul and accelerate their readiness for the job market.
